

QUIET LOGIC PRESS

BONUS NONOGRAMS

Six Free Logic-Picture Puzzles

LARGE PRINT • VERIFIED

A free companion to your Picture Nonograms collection

with our compliments — Logan Pierce

Every grid independently verified — one unique solution,
solvable by pure logic, with zero guessing.

Fill in the grid from the number clues. The picture reveals itself.
Solutions — with each picture named — begin on the answer-key page.

Free for personal use · print as many copies as you like.

How to Solve

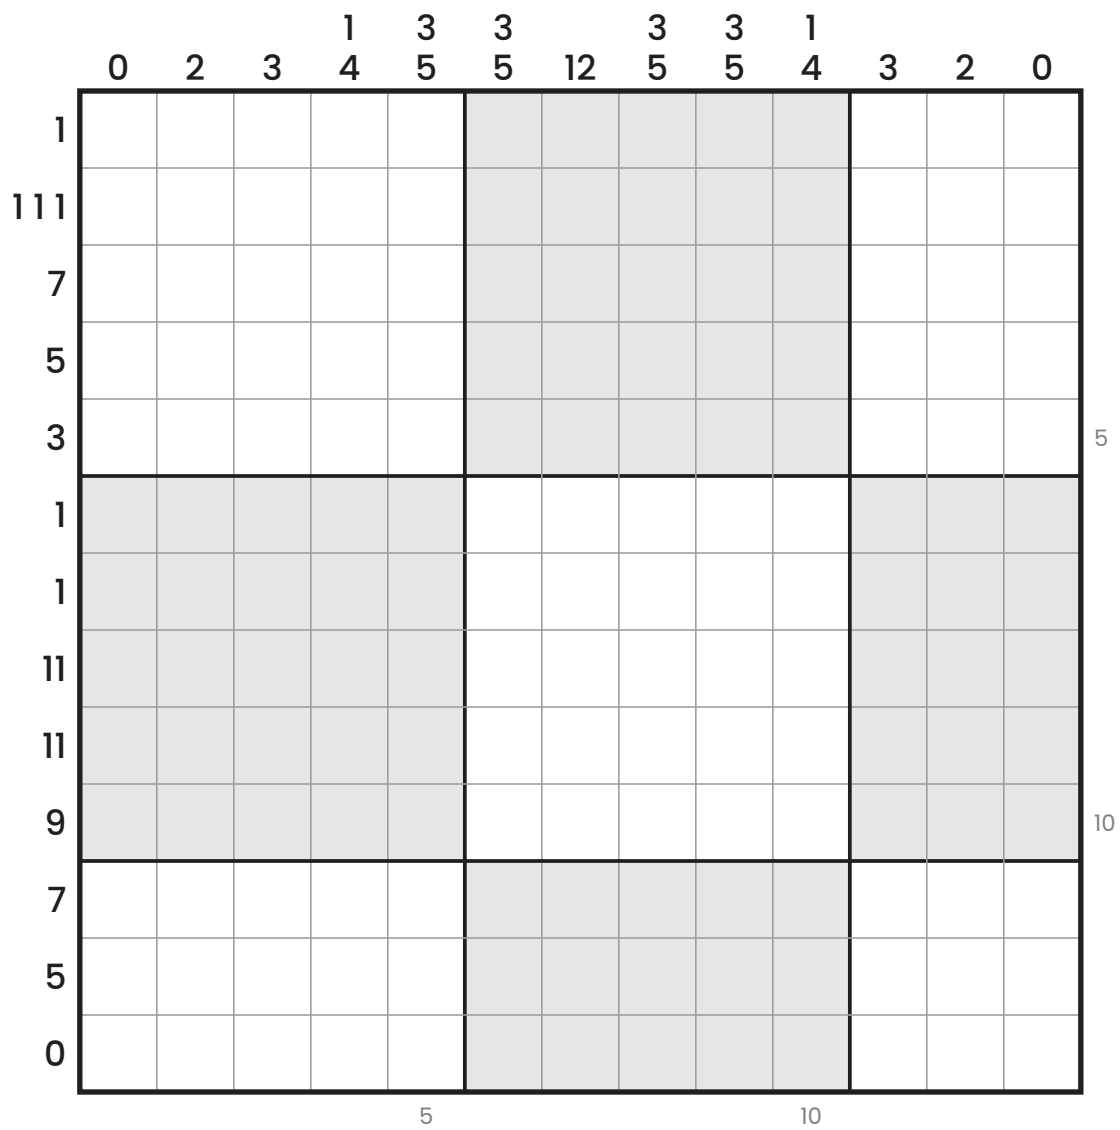

Each puzzle is a hidden picture on a square grid. The numbers along the top and left edges tell you the runs of filled squares in that column or row, in order, with at least one blank square between separate runs.

Work the rows and columns against each other. Mark squares you know are filled, and put a light dot in squares you know are blank — those dots do as much work as the filled squares. Every puzzle here can be finished by logic alone: you never need to guess. When the grid is complete, a small picture appears.

Heavier lines every five squares help you count. The bold number beside each puzzle is its difficulty, gentlest first.

PUZZLE 1

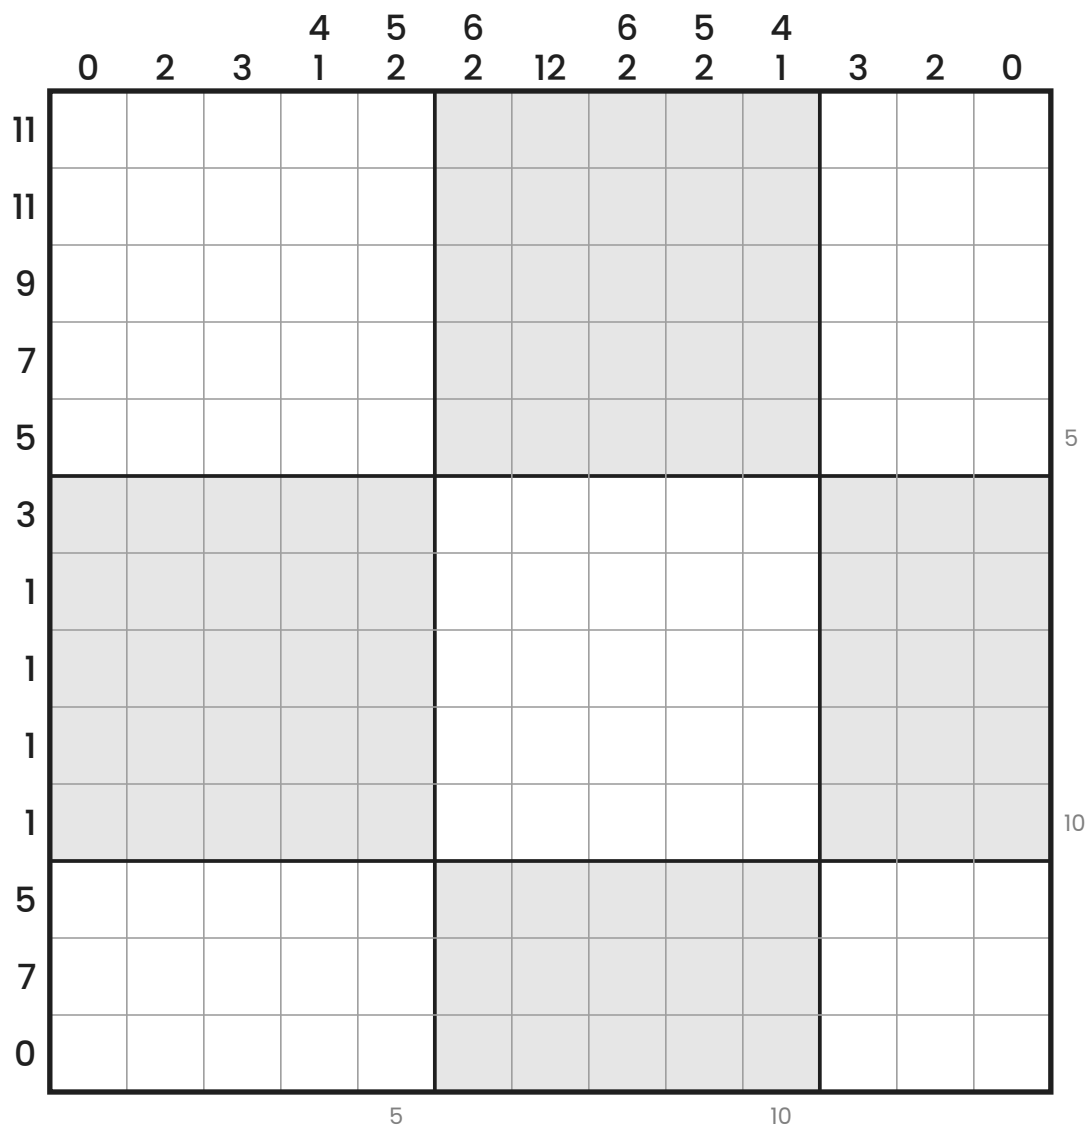

Gentle · 13×13

Solve by logic — no guessing required.

PUZZLE 2

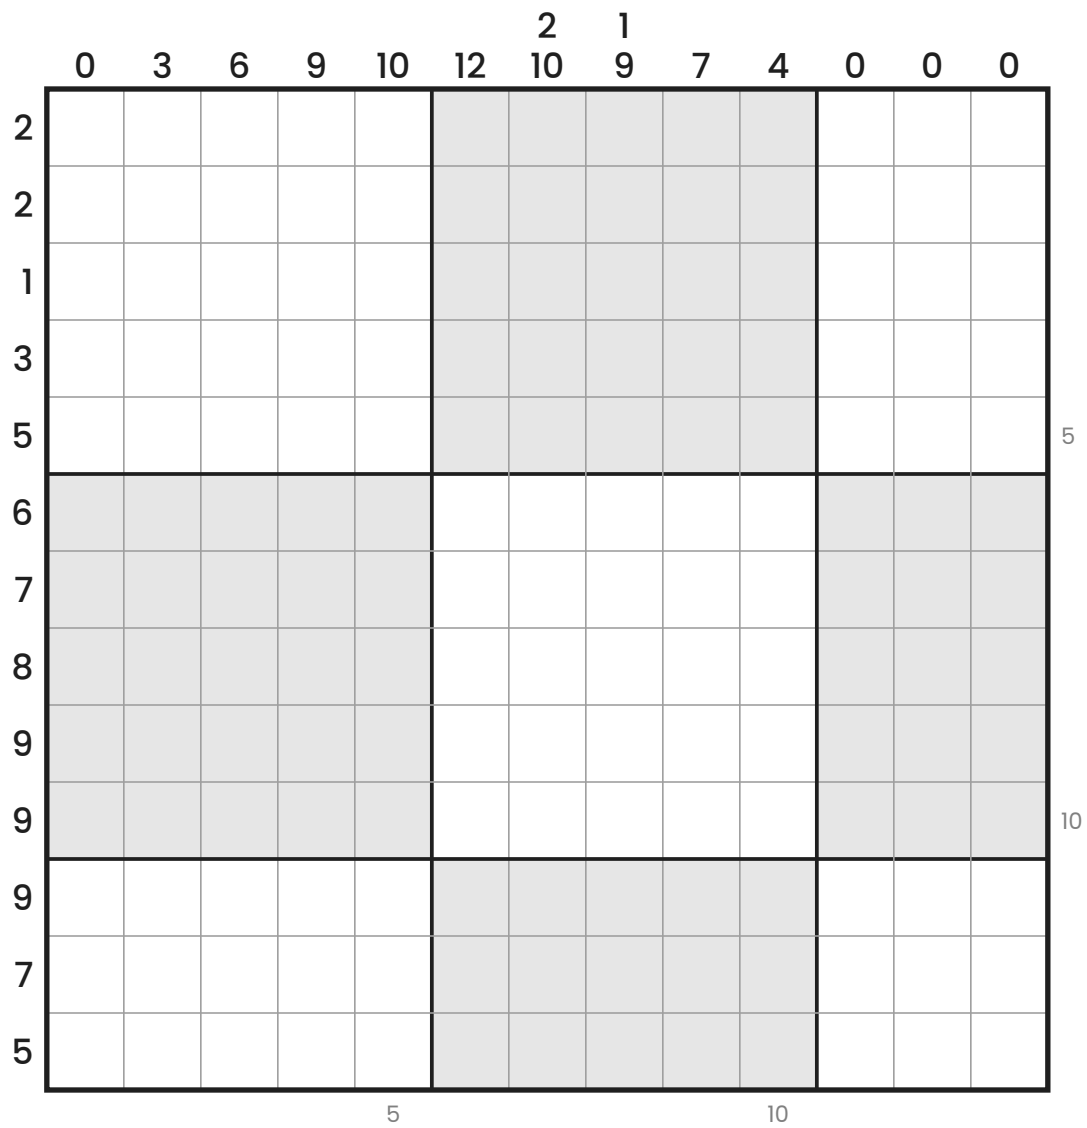

Gentle · 13×13

Solve by logic — no guessing required.

PUZZLE 3

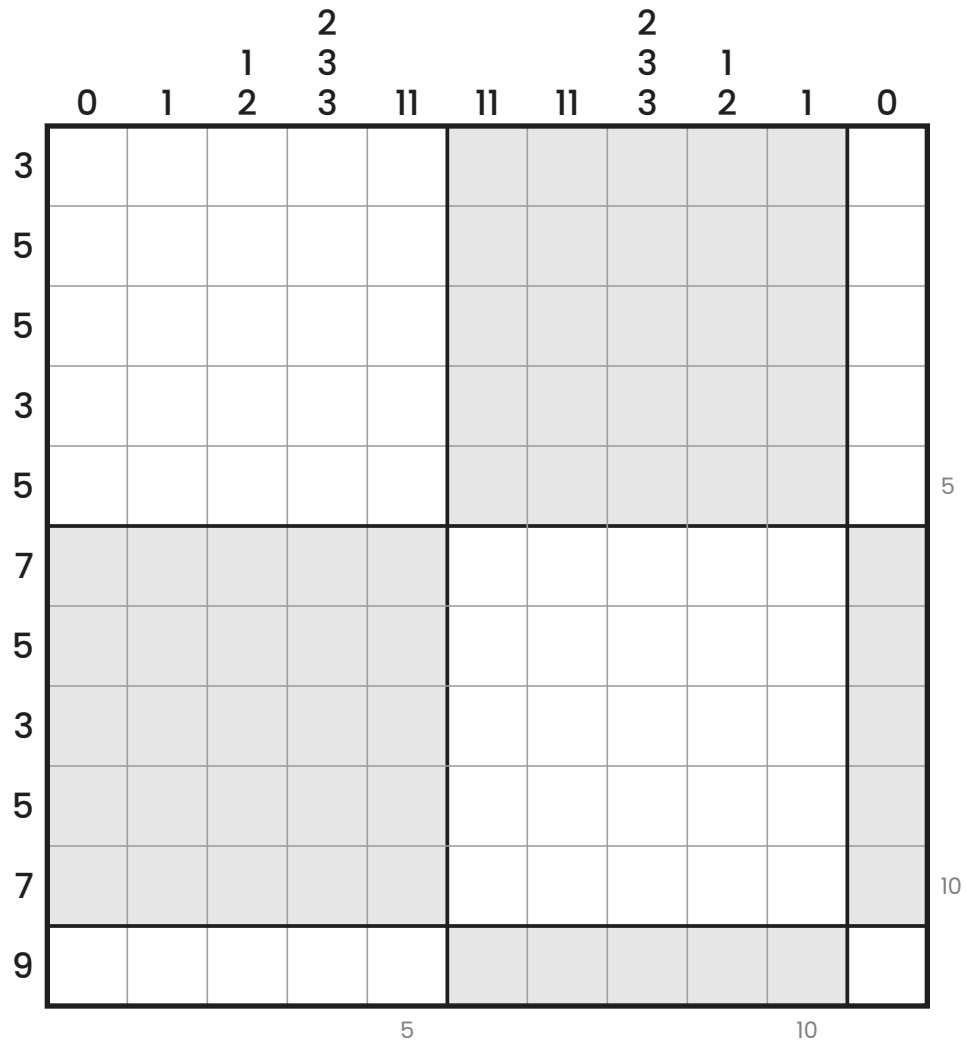

Steady · 13×13

Solve by logic — no guessing required.

PUZZLE 4

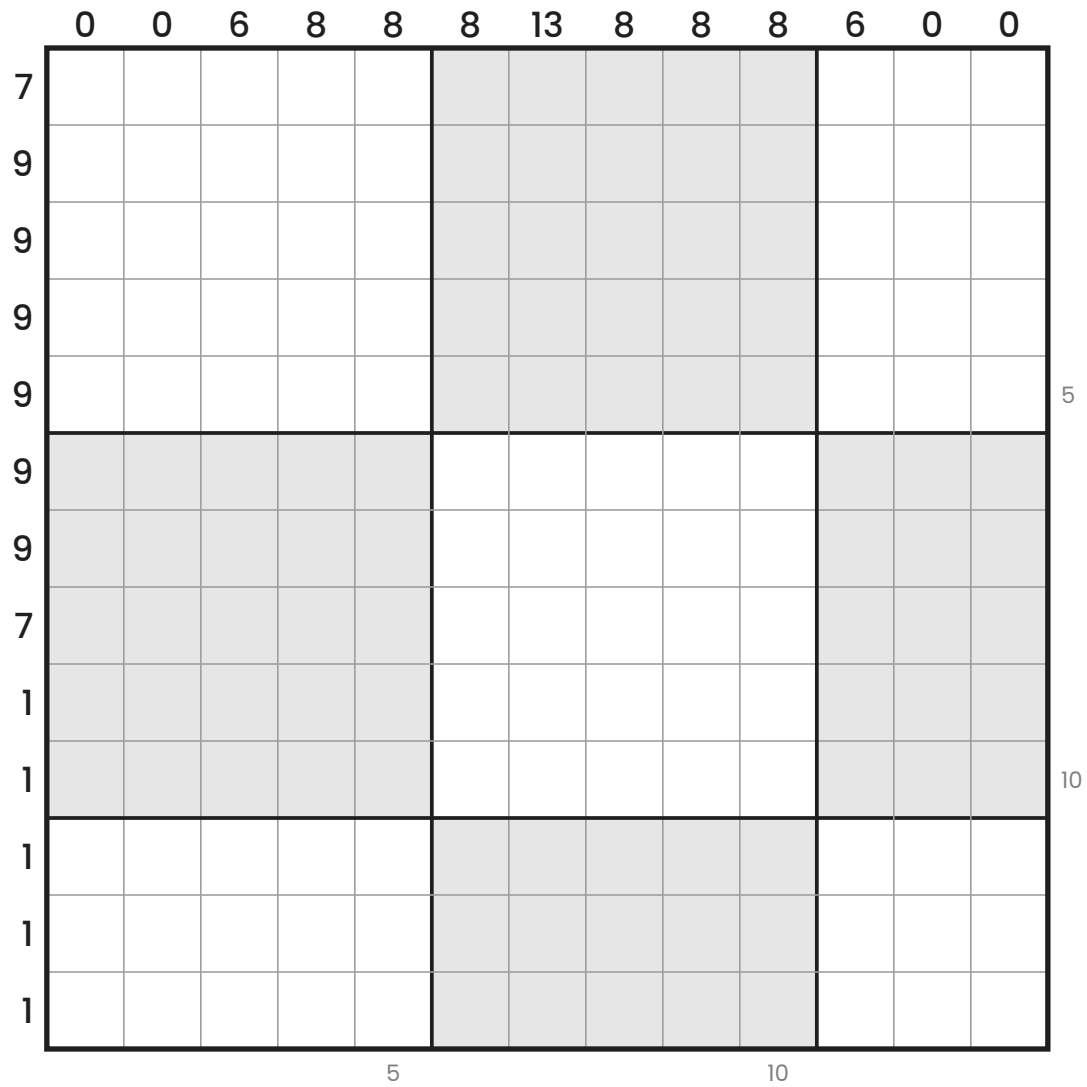

Steady · 11×11

Solve by logic — no guessing required.

PUZZLE 5

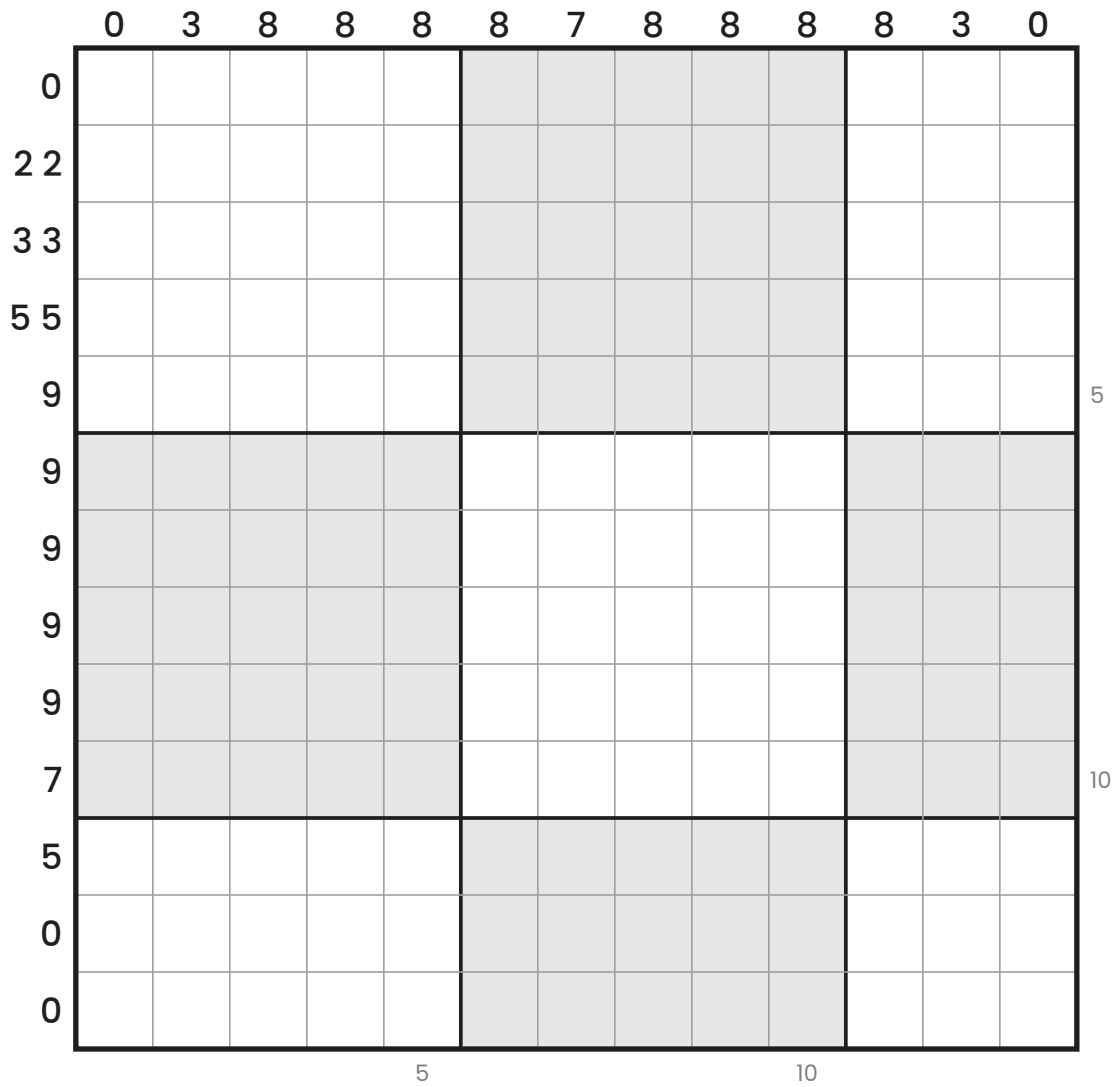

Brisk · 13×13

Solve by logic — no guessing required.

PUZZLE 6

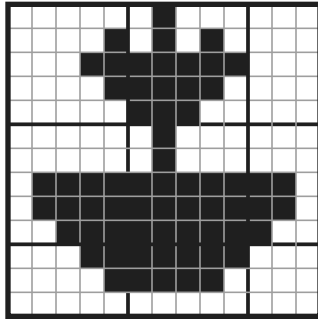

Brisk · 13×13

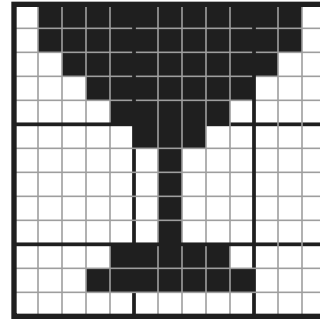

Solve by logic — no guessing required.

Answer Key

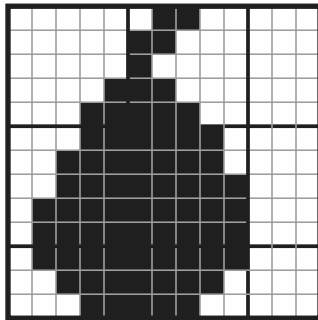

Each completed picture, named at last.
